REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art has been found that either teaches or fairly suggests the manufacture of a polymer blend comprising two distinct nitrile rubbers having Mooney viscosity values that differ, as recited and claimed, and which composition is multi-modal. The references cited on the Information Disclosure Statement of 2 February 2006 do not teach or suggest the blends of nitrile rubbers wherein the Mooney viscosity values differ, as claimed. The remaining rejection of the claims under the judicially created doctrine of obviousness-type double patenting over copending application SN 10/726,329 has been overcome by the filing of the Terminal Disclaimer of 30 March 2006. Nothing is taught or suggested in either reference to Oyama et al, Buding et al ('627) or ('128), Magg et al or Pirelli Societa Per Azioni (GB 809,722), which correspond to the references cited in the European PCT Search Report, to manufacture a composition and subsequent formed articles from a nitrile rubber blend having the characteristics recited. Since there are no other outstanding issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
